

We are looking for... You! As
Satellite Operator (m/f/d)

You want to engage in cutting-edge research?
want to craft something unprecedented?
embrace challenges and variety without hesitation?

Join our young and extraordinary team today, and contribute to our upcoming missions!

Your future tasks with us include, for example:

- Develop and maintain operations documentation, including mission procedures and operational scripts
- Troubleshoot detected anomalies and manage contingency scenarios, providing support for problem resolution
- Monitor the functional status of the Ground Segment and provide regular reports
- Review space-to-ground interface specifications, flight operations manuals, and other relevant documentation
- Present operational concerns and constraints, engage with other teams to influence key decisions
- Participate in technical and progress meetings, providing updates on project status and progress

Our Requirements:

- Bachelor/Master's degree in Aerospace Engineering, Space studies or similar
- Knowledge about satellite sub-systems and Satellite Communication
- Familiarity with hardware and software system maintenance tasks
- Interest in Space Industry and Satellite Operations
- Strong problem-solving skills and the ability to react fast
- Strong English skills in writing and speaking, German language skills are advantageous
- Flexibility in scheduled working hours (ability to work morning, evening, and night shifts)
- Space and ground segment engineering experience is beneficial

We offer you:

- An interesting, challenging role in the field of aerospace
- The opportunity to be at the forefront of global research
- A relaxed working atmosphere with a lot of autonomy
- An appreciative, dedicated, and international team
- Good opportunities for professional and personal development

We look forward to receiving your application at
