

We are looking for... You! As  
**System Engineer (m/w/d)**

**You** want to engage in cutting-edge research?  
want to craft something unprecedented?  
embrace challenges and variety without hesitation?

**Join our young and extraordinary team today, and contribute to our upcoming missions!**

Your future tasks with us include, for example:

- Mission analysis, design, MAIT, and operations in phases 0-F
- Detailed requirements definition and tracking
- Mission management as well as hardware and software development coordination

Our requirements:

- Bachelor/Master's degree in Aerospace Engineering or similar
- Hands-on experience in complex (space) projects
- Knowledge of technical requirements definition and system modelling
- Experience with model-based systems engineering tools
- Experience with HW/SW development and lab equipment
- Very good English skills in writing and speaking, German language skills are advantageous

We offer you:

- An interesting, challenging role in the field of aerospace
- The opportunity to be at the forefront of global research
- A relaxed working atmosphere with a lot of autonomy
- An appreciative, dedicated, and international team
- Good opportunities for professional and personal development

We look forward to receiving your application at
